

TV DX THIRTY YEARS AGO

Compiled by John O. Broomall, Route 1, Broomall Trail, Waleska, GA 30183
Reader response requested — should this column continue monthly?

AUGUST 6, 1957 Vol 4 #8 - EDITORIAL (Bob Seybold, President) - Get ready for double hop Es and good VHF-UHF tropo. If you can't get WAIQ-2 AL to verie write me for a special verification form which should work. Renewals in from Ed Hepp, Al Caldwell, Ivon Harris, B.H. Rauch, Carl Lord, Jim Howarth, Jim Brown, and Ken Stoll. Western members getting terrific Es including double-hop to South America; in the Northeast Es openings few but strong and prolonged.

TECH NOTES (Schafer) - AT&T publishes a free booklet, "Television Signal Analysis," which contains valuable test pattern information. Dipole are useful for knocking out low band locals. Use a 92" dipole (two 45" elements) make of stacking bar rods for channel 2/3 locals. On channels 4-6 use a tripole stack from an old Channel Master Champion. When skip hits connect in parallel with your outside antenna and rotate 90°

FCC NEWS (Collins) - Drawing of FTWO-2, Bangor, Maine, TP at top of screen. Call letters assigned to KSBY-6 CA, WJCT-7 FL, KOCA-7 OR, WTPA-27 PA, WTVM-28 GA, WBPZ-32 PA, and WCMB-71 PA. New: WPST-10 FL, WSPD-6 KY. Power increases: KTWO-2 WY, WIS-10 SC, WSYE-18 NY, WEEK-43 IL. Went dark: 15 in Bloomington, IL. FCC wants Albany, NY to be all VHF with six channel changes in area. Suggestion for AIPA ham net. Send a 24 post card if you need report forms!

RANK COLUMN (Spaulding) - KOTI-2, KLRJ-2, KLEW-3, KIEM-3, and KBES-5 all sign on between 1300 and 1400 EST. Verification signers listed for nine stations. "WCET-48, Cincinnati is the first educational station (in the state?) and will increase to 40 hours weekly this fall.

EASTERN DX (Seybold) - 28 reports on three crowded pages. Best June skip dates were 2, 10, 11, and 21. July predictions: 7 (convention time), 18, and 19. Clarence Rarehide, New Orleans, reported 137 loggings; with 42 new stations his totals now 144. Mainly skip; but June 30 tropo to 780 miles. Carl Howington, OH, logged 13 new this time to bring totals to 81. Bill Draeb, WI, logged eight new bringing his totals to 87.

EQUIPMENT TABULATION - Ed Rugel, KS: 14" 1957 Zenith portable, CM broadband yagis 2-6 and 7-13, 60" mast, daily reception to 210 miles. Doris Johnson, WA: 17" 1954 Pilco, Trio Zepher Royal, Colinear stacked for UHF, Alliance T-10 rotor, 40' tower, daily reception to 300 miles VHF and 50 UHF. Ed Shorey, KS: 1954 21" RCA, 2 bay conical, 5 element yagis for ch 5-8, 10 element UHF yagis, 25' high, 165 miles daily.

WESTERN DX (Johnson) - Reports from 11 DXers filled two pages. Two Hot Springs DXers got the hottest DX: Bedford Brown logged 171 stations in 16 days; total of all types on June 10 were 78; Jerry Burch got 155; best days were 10th with 60, 11th 58 — with 7 news his totals now 169. Lighting smashed editor's antenna.

INTERNATIONAL DX (Simkin) - Morris Foote, ID, reports XETV-6 and possible XEJ-5 Juarez. CMAB-2 is key station in Cuba's Tele-Mundo network which includes relays on 7, 8, 9, 11, 12, and 13. Their stationery includes the CBS eye! CMQ-6 calls itself Tella Villa. Stanley Pene, NY uses a "police alarm" radio and a Hallcrafters S-106 6 meter receiver to log the BBC and French TV audio. Gordon says Allied Radio has four models covering 30 to 50 MHz and ranging from \$50 to \$150. Es DX seems to be best before or just after F₂ peaks. Therefore, Gordon predicted good Es dates to be July 8-12, 15-17, 21-24, August 3-8, and 11-14. Es will drop rapidly after that but F₂ should pick up.

BACK TO THE FUTURE (1987) - Several readers have asked about the current calls letters and location of stations listed in this column. Unfortunately, I don't know; it would require many hours to research. Perhaps some of you could submit "call letter changes through the years" on some of your locals.

DX TRIVIA - Submitted by Matt Sittel: Do like the Romans do when playing this game; it's mellow, senior, for my channel's by name! Give call, city, state. Viva Espanol!

Matt's TV DX includes 37 states, 4 Mexican states, and 5 Canadian providences. Best includes KTVU-2 San Francisco; KYUS-3 Miles City, MT; XHD-4 Tampico, Tam., KOAA-5 under local WCYB; TV8 Cuba; KAVE-6 Carlsbad, NM; WBBJ-7 Jackson, TN; and WKZT-23 Elizabeth, KY.

STATION OF THE YEAR - If WFTDA gave awards to TV stations, new Chattanooga area station WFLI-53 (see June "Features", would be a strong contender. One of the engineers, **Les Hayburn** is a new member of WFTDA, the C.E. is also a TV DXer, and then have placed an antenna for DXing on their transmitting tower. With a smaller antenna under normal conditions, they can pick up 30+ UHF stations from WFLI's high location.

Also, yours truly was a guest on their "In the Morning" show, talking about TV DX and resume preparation (videotape available). The station solicits DX reports and will give a subscription/renewal to VUD for the most distant logging this year. The best is last — WFLI has invited WTPA to hold its 1988 convention at the station!

FAN MAIL - "It's really a gas seeing what DX was like 30 years ago (Frank Merrill; Macomb, IL).

VIDEOTAPE VERIFICATIONS - Our Photo Editor, **Dave Nieman** (12284 Nice Road, Akron, NY 14001) has 163 local and DX stations on a VHS videotape covering January 84 through the present. Dave has a computerized list of taped loggings. He has a 1982 2 head Panasonic fed from Teknika tuner and a 1986 Mitsubishi with MTS/SAP. Dave uses Scotch, Memorex, Fuji, or TDK tape; he will exchange and hope that you use a quality tape also.

Dave belonged to the AIPA in the late 50s and feels **DXing 30 Years Ago** and **Features** made the VUD more interesting. His TV bandscan includes 23 stations from Buffalo, Rochester and Canada: Toronto, Barrie, Paris, Hamilton, Peterborough, and Uxbridge. He is a real snow watcher!

Tracy K. Wood, KDOUP, is an Operations Research Analyst (statistician) with the Army Singal Center, Fort Gordon. He lives in Hephzibah, a suburb of Augusta, Georgia. He started DXing after attending the Portland WFTDA Convention in 1977. His interest include ham radio since 1983 (holds Extra Class license), SWL and FM with a Uniden CR-2021, and an "insensitive b&w TV." His apartment location means no outside antennas. Tracy's interest in Spanish language broadcasts goes back to the high school year he spent in Bolivia as an exchange student.

Es was Tracy's main form of DX in Oregon; the South has shown "the power of tropoducting." His best TV catches range from Raleigh to Jacksonville and inland to Alabama. About 60 percent of the time he receives Columbia stations plus WHNS-21 Asheville, WAXA-40, Anderson, and WSB-2, Atlanta. He has received 38, 46, and 69 in Atlanta a "few times" but has a real struggle with WGTW-8, Athens, and WTBS-17, Atlanta. (Channel 17 DX normally means WUNE-17, Linville, NC.) FM receptions to Atlanta is better.

Tracey's TV news from the "Central Savannah Area": W67BE, Augusta, has 100 watts, a 10 mile coverage area, and carries everything from Atlanta Hawks to foreign language movies. WHNS-21, Asheville, hopes to have a satellite on channel 48 on the air near Greenwood, SC, sometime next year if the FCC gives approval within the next couple months. Programming to be 90 percent duplicate of WHNS-21.

NOTE WHNS-21's manager supplied additional information. Because of a real estate problem the tower site will be moved 10 to 15 miles; ERP to be 2761; HAAT 1570. WHNS claims to be one of very few circular polarized UHF station; also it city grade signal extends 90 miles to the South and West according to recent engineering signal measurements!

DX TRIVIA - The winner of the May contest was Matt Sittel of Kingsport, TN. Others with Florence AL and Florence SC as the right answer were: Ed Cotton, Frank Merrill and Dave Nieman. Several pointed out that Florence SC has three TV stations; hope this did not confuse any of you.

AUGUST TRIVIA - All answers to the following questions are TV channel numbers. (1) Grandfather can't go any higher, (2) Today you can't go any higher, (3) This channel is strictly out of the world - if your mind is blank, so is the channel, (4) Bruce Elving is in the middle, (5) the same city can't have stations on adjacent channels — this is the exception to that rule. (6) You have to look almost to ancient history to find this one. **NOTE** There is a pattern to the answers and I don't mean test pattern!

BONUS Explain "why" in answering questions three, five, and six. **NOTE:** Since no one else has offered a more valuable prize (hint, hint), the winner, to be announced in October, will be loaned a year's supply of AIPA bulletins from thirty years ago.

UHF STATION RECORDS UHF STATION RECORDS UHF STATION RECORDS UHF STATION RECORDS

Compiled by John O. Broomall, Route 1, Broomall Trail, Waleska, GA 30183

Please use the following format in submitting your claimed records: Channel, call, state, varie code, distance, and initials of record holder(s). Codes: L = letter/card QSL, P = photo varie, T = videotape varie, underlined = station verifies as record (if DXer name not supplied then the city/state of the logging is given). Logging with no codes are unverified. The record for each channel is listed first.

NOTE - When the station indicates a logging is the record, it is listed regardless of distance. It may not be the greatest distance because of incomplete station record keeping or the true record holder has not written for a QSL. Check the following; send in your loggings which top these listed! Verified loggings top non-verified.

FLASH FLASH - NEW STATIONS AT DEADLINE!

TN Lebanon WJFB-66 is now on the air with 100KW and ACTS (Christian network) programming from 6 a.m. to midnight. (Previously station was a 75 watt LPTV on channel 11.) Write: Rick Geotz, C.E.; 200 East Spring Street, Lebanon, TN 37087. Station's normal coverage area is a 40 mile radius and includes Nashville.

Trinity Broadcasting Network (TBN) has just published a detailed list of all 138 commercial and educational full, medium, and LPTV stations on, under construction, or projected stations including owned stations and affiliates. This list was in TBN's July newsletter and is a "must" for an TV DX Database. I am trying to get copies. Write me, or TBN at Box A, Santa Ana, CA 92711. Houston is now on the air and Bloomington very soon.

DEADLINE: The 1st

TV-DX LOGGINGS FROM MEMBERS IN AL, CT, DC, DE, FL, GA, IN, KY, MA, MD, ME, MI, NC, NH, NJ, NY, OH, PA, RI, SC, TN, VA, VT, WV, Quebec, Ontario and the Maritimes

"Are we in E-skip heaven or what!?"—Scott Hood
"There have been no days when there wasn't E-skip."—Bob Seybold
"Incredible!"—Charles Gauthier
"The best June I've ever experienced..."—Frank Wheeler

E-skip is back...and how! Although not all openings have reached a high MUF, and not all have been intense, most areas covered by this column have experienced almost daily openings in June, keeping us glued to our receivers in much of our free time. Hardly anyone has not added at least a few new stations to their log. After a number of mediocre summer Es seasons in recent years, this ionospheric bonanza is very welcome! Looks like the longest column since I've become editor, so let's get on with the DX!

Thomas J. Yingling, Jr., 221 Pinewood Road, Baltimore MD 21222-2345

"Lots of skip in, and being home to get it this year is nice. If you can't afford Channel Master traps, I suggest getting the Winegard TSC models. They are 30db attenuation fixed for 1 channel (the CM traps have up to 60db). I was in a local electronics store and just happened to notice that they had moved the TV supplies out from behind the counter, and there it was. Not a bad buy for \$19.95. I got lucky and got 2 more of the CM traps at a good price. I have a real time with local 22 and 24 messing up the 20's range, but I find having 3 traps tuned to one channel is hard to do, so I just use 2 traps, and have put my older trap in mothballs for awhile."

---SEEN SOME GREAT DX?? WHY NOT SEND IN A REPORT AND SHARE IT WITH OTHERS?---

"Just a summarized report of DX activities of late here. Have been very busy with work and my father's health being bad has limited my DX activities. However, I have observed a lot of E-skip and a good amount of tropo, but I have not logged a lot of it. No hills DX as no time to go up there and observe it."

"I did miss some early-season E-skip, but I have observed loads of E-skip in the past 20 days (letter dated June 21--jfc). There have been no days when there wasn't E-skip. Warm and humid weather during past 2 weeks has brought varying amounts of tropo on most days. Some noteworthy days:"

JUNE 1987

- 14 E "Heavy...all channels 2-6 + FM strongest from late afternoon into evenings: TX,OK,KS,AR,LA."
- 15-21 "E-skip all days...late morning into early afternoon, then resuming again about 1700-1800 and running another 2-5 hours. Some late evening E-skip. Had double-hop into Mexico and NM on one occasion--a couple of openings were very intense, even on channel 6. Skip covered FL to TX to Dakotas to CO. Today, June 21, skip into FL and over to TX and then KS. Locals on 2 and 4 easily overridden on most openings indicating very strong signals."

"Tropo in this period had openings into IA on one occasion, good OH valley openings, some ducting into southern IL and MO (St. Louis and Kansas City). Had rare channel 42 Muncie LPTV on one opening (W42AC--jfc)--channel 49 Muncie super-strong in that opening--super Indy signals, also rare WFIE-14 Evansville. Believe new channel 62 in Lexington KY is on and reaching my system, creating some QRM for Detroit's channel 62. WHAT-53 Chillicothe OH also observed. Channel 68 religious LPTV in Ft. Wayne also good in one opening. Channel 60 Gary-Chicago in at times, also Chicago 26,32,44,50; however, channel 38 Chicago missing in these openings--why? Will close this report for now...hope next report will be more detailed. I'll keep observing and hope to attend convention, but if I can't make it, I hope it is a success."

Alain Pepin, 234 rue Montcalm, St-Jean-sur-Richelieu PQ J3B 3N8

"Thanks to your column, I made contact with DXer Charles Gauthier. We are now advising each other on E-skip openings. (That's the nice thing about WTFDA--getting in touch with other DXers in your area. It multiplies the fun of the hobby--jfc) This is the best E-skip I've seen so far. Just this evening (June 19--jfc) I got a tentative CJCN-4 Rattling Brook NF. The splitter amplifier made the big difference. Things I could never get are now booming in...very little UHF, though....I tape my catches on video. KTIV-4 was crystal-clear--I couldn't have gotten it any better directly under the transmitter! The Mitsubishi HS710UR I use amplifies the signal, allowing me to watch programs on WMTW-8 effortlessly." (Charles, I assumed that your asterisked loggings were new, no?--jfc)

"Nice to hear some FF"

"Incredible!!! After such a cold and lousy month of May: BANG!!! A complete week of great E-skip openings, plus much more. You can see the results: 35 new stations and a personal record of 1464 miles (KTVY-4 OK)...plus it was my week off! All these stations were picked up on my regular equipment but could all be seen on rabbit ears."

"New equipment consists of a Channel Master 6-ft. UHF parabolic, CM rotor and Winegard CP-4800 pre-amp. I recently rejoined WTFDA, so this is my first DX report in a long time. I really hadn't been very actively DXing the UHF-TV band for about 5 years or so, and the first thing that confronted me, once the new system was installed, was the incredible increase in the number of new stations out to about 200 miles. This can be quite frustrating when tropo is up a bit. For example, the morning of 6/14 there was very intense tropo with signals noted here as far as PA and ON to the west and MO to the west. But everything was buried in CCI. The only new logging I could pull through this stuff was channel 41 in KC. I'm sure much more would have been possible were it not for all the regional activity."

"Anyway, I have a couple of questions, if anyone can answer them: (1) Where is the transmitter located for WNTD-35? I notice that La Salle is a good distance from Chicago. How can they ID as La Salle-Chicago? (As long as they mention the actual city of license first, they can add secondary cities to their ID. Presumably, they could ID as La Salle-Poughkeepsie if they wanted to--jfc) (2) Does anyone know of a good commercial VHF-TV antenna that will also give respectable performance on the FM radio band? I'm presently using my old Stereo Probe 9, with an antenna switch, for both FM and VHF-TV. I don't have room on my tower for separate antennas. Can anyone help? (There are a number of commercially available antennas made to function on VHF-TV and FM radio. Maybe Rich Wertman or one of our other members who deal with such equipment on a regular basis could give you some specific recommendations--jfc) Hope everyone's having a good summer!" (Nice to have you back, Bob!--jfc)

"This is my first report to a TV column in the VUD; in the past I have kept logs, but they were rather inconsistent. I am currently using rabbit ears and a 4 bay UHF antenna indoors. I plan to build some quad loop antennas for VHF."

"The tropo on June 19th was the best yet to the East. Unfortunately, New York City, Philadelphia, and the other major Eastern cities were not seen. I'll bet that DXers west of my QTH also picked up on this opening. This is the best tropo I have seen since the Super Tropo of last Thanksgiving, when I, along with everyone else, managed to get Oklahoma City and beyond."

"I will do my best to find the time to report on a monthly basis. I am 19 years old and attending Indiana-Purdue University at Ft. Wayne on a full scholarship from a very generous engineering firm in the area. They have also given me a summer job."

Robert Grant, 5775 Bishop, Detroit, MI 48224

Now, this is a one month report!! after looking like a dud season in May,

Es came back in June like crazy, and when one opening would fade away, another one

would start in a different direction. MUF's have been low (only 2 openings into FM)

and the early evening hours have hogged the Es (very little mid-morning Es) I rate

6/87 Es, on a scale of 1-10, Quality: 3, Quantity: 9%. The unusually warm, humid wx

made semi-locals a big problem during Es sessions, particularly WYIC-3 and WENS-5,

the Powerful Pests of Parma."

The Tr continued to come, with good openings on the 5th and the night of the 18th.

I read that in addition to WUCX-35, Bad Axe also just got a ch 41 assignment. What

puzzles me is that a UHF station has been built where by distance standards it appears

that the Thumb area could have a channel three, plus offset allocation. Are offsets

when setting distances? WTVY-9 and WACN-9 seem to provide evidence to the contrary,

you first set the distances and use offsets to their best. I also have a scheme that

allows CKVR to go minus without interference- it involves switching zeros and minuses

at six other US stations, WWAY being the end of the chain reaction."

Speaking of 3, how about Portland, ME, or maybe Bath, ME as a rim-shot if

Portland is too close to Burlington, VT? (Robert's comments continue on the next page....)

"The Tr of the 18th and 19th was not very deep, but was strong enough to bring out 2 weak UHF's not seen before. In 9 years of DXing, I had not seen anything on channels 39 nor 52. It was nice to fill both those holes in one night. This leaves me with 5 such "holes" (not counting 1,37 and 70+, of course); they are: 58,60,63,65 and 69. (Actually, I got TVOntario on 60, actually transmitted on that channel, but I don't count it in my log.) (Though WTFDA logging rules would allow it--jfc) My "weird unID" on 3, mentioned last month, was KOTA." (But what in the world was that bizarre programming they were airing??--jfc)

"I've read your 90-day policy, but I think my report comes under the 'pitiful levels' exception! (I hadn't thought of a 'pitiful levels' exception, but it's a good idea, hi--jfc) May '86 logging was at my old address, 2030 Hering Ave. June '87 loggings were in the lounge TV (fixed outdoor antenna) at New York Medical College at Valhalla, 15 miles north of here. Since June '86 I've been living in a DX hole. I'm 2 steps below ground level. Astor Ave. rises directly east and west of here. And the ground rises to the north as well. There's a little level ground to the south before you hit a hill. Forget tropo; high-angle propagation only! Later I haven't gone very hard at solving my unIDs. On the other hand, I've gotten good at DXing thru locals on 2,4,5. At home I use rabbit ears. Vertical polarization (for Es) seems to help more against ACI than against co-channel locals. A good horizontal null has sometimes brought even aural DX thru local. But for video, especially zero offset, the best null on the local isn't always best for seeing the DX; sometimes it's better to have that strong steady local vert/horiz sync signal." (More of Robert's comments next time--jfc)

* "Logged on Regency R1075 scanner"

"Are we in E-ksip heaven or what!?! As I have been forced out of 'the shack' from 0800-1830 5 days a week, I expected my E-skip encounters to be few and far between. So much for expectations! One unusual thing is the time of the openings. The peak time has been about 1900-2200. Between June 1-15, the 11th was the only day I failed to log an opening (and that's being away 0800-1830). Needless to say, tropo appears to be almost non-existent this year. Finally, my father got a Regency R1075 scanner (the old Bearcat died). While playing around with 'search,' I found the audio images of channels 2-4 as follows: Ch. 2 38.34(-), 38.35(0), 38.36(+); Ch. 3 44.34(-), 44.35(0), 44.36(+); Ch. 4 50.34(-), 50.35(0), 50.36(+). Incidentally, 42.42 mHz (IN State Police) is the hot freq when Es is in that area, as it turns into a CONSTANT chatterbox!"

TV unids, cont.:

Robert Grant, 5775 Bishop, Detroit, MI 48224. editor.

1987: Sat 13 Jun Es ch 3 1905 EDT-- mcast with "Osark Life" segment- talking about a small town general store in Missouri. (PTA: SW. susp KITV.)
Mon 15 Jun Es ch 6 2046 EDT-- ABC BS // WXYZ-7, minus offset. (PTA: E. susp WFTV.)
Fri 19 Jun Es ch 3 1720 EDT-- "The Brady Bunch" zero or minus offset. (KATC-LA in, PTA: SSW.)
Mon 15 Jun Es ch 6 2325 EDT-- CBS, minus offset, promo for "Eyewitness News" (next.)
(PTA: SW, W. suspect KFLD. KNBS-6 NE in at 2340.)
Thu 25 Jun Es ch 5 1044 EDT-- ad- "Stallone's Restaurant, Highway 71 North." (KITT-TX in)
" " " ch 6 1208 EDT-- "Consumer Discount Network" (PTA: TX, AR, NM, OK.)
" " " ch 6 1215 EDT-- CBS, ad- "Lightning Rental" ph #761-5511. x or - (susp. KAUZ)
" " " ch 5 1215 EDT-- "New Dating Game" (x or -, could be KOAA, which was in)
Mon 29 Jun Es ch 5 1805 EDT-- "NBC Nightly News" (this is 6:05 PM E and 5:05 PM C, weird time for national nx, isn't it? KNMZ-2 NM in at 1815.)
" " " ch 6 1815 EDT-- "New Dating Game" (PTA: SW. suspect KIDY.)
Fri 3 Jul MS ch 3 0504 EDT-- Full CBP (that is, no BS bottom) almost full or writing. (not sure if electronic or optical text) appeared to be three things and cities (e.g., three stations, station and two xtrs, station and two microwave links.) and a very high-pitched test tone. (susp. KNW, WSTM, WRCH, WCAX.)
Fri 3 Jul Es ch 5 2205 EDT-- opera with bluish-green thunderstorm graphic in LL. (minus offset, suspect KITT.)
Sun 5 Jul Es ch 3 1750 EDT-- zero offset, mid-to-late 1970's movie or TV series (but not sitcom) with outdoor scenes (film, not V-tape) Lloyd Bockner seen. station started ad string at 1756, fade out, no details seen, fade in at 1758:50 with pgn, no ID at 1800:00, fade out at 1801:40. Signal strongest when antenna DEAD NORTH (171) (suspect KDLH or CICI1)
(recurrent) CW ch 5 OFTEN-- weak signal from SSW, non-standard offset. (suspect an LPTV in the Toledo area, near Adrian, MI or in NW Ohio.)

FM unids:

Robert Grant, 5775 Bishop, Detroit, MI 48224. editor.

1987: Tue 16 Jun Es 92.7 (or '5, '9.) 2050 EDT-- "Here in The Commons at your Diamond Drop station" (PTA: TX, OK.)
Mon 29 Jun Es 107.9 (or '7) 1945 EDT-- rm (soft rock) "K-108" with request for listener in "Hillsdale" or "Hillsville" or "Hillsomething" live white male DJ. (PTA: NM, TX, OK, LA, MS, AL.)
" " " 93.5 (or '3) 2030 EDT-- A/C auto with very audible beep between each song. heard for 20 min. with no announcements or ads. stereo. each beep was modulated by a rumble. (PTA: same as above. new station testing?)

This has to be one of the busiest Es seasons in memory. Although few openings made it into the FM band, some Es on TV (some only on ch 2) has been noted on the following dates: June: 1,2,3,4,5,8,9,10,11,13,14,15,16,17,18,19,20,21,22,25,28 and 29. July: 3,5,6 and 7 (type at 0500 7/8.) This may bore Pat Dyer, Jim Pizal or John Combs, but at this latitude one month with 22 Es days is something to write home about. TV CCI AIDS is now a separate column by John Combs. FM CCI AIDS is still part of this column but FM NON-IDS go to Bruce Elving's FCC FM NEWS.

John F. Combs, 1308 Willow Branch #24, Jacksonville, FL 32205.

1987: Thu 28 May Es ch 2 1700 EDT-- start "New Newlywed Game"
Thu 4 Jun Es ch 6 1224 EDT-- "Jeopardy" (PTA: NE in AND Central U.S., multi-cloud Es)
Tue 9 Jun Es ch 3 1218 EDT-- "Leave It To Beaver" (suspect CKVR)
Wed 10 Jun Es ch 3 1630 EDT-- start "Hollywood Squares" (PTA: Midwest US)
" " " ch 2 1639 EDT-- "Happy Days Again" (PTA: " ")
" " " ch 2 1640 EDT-- "Divorce Court" (WJBK checks, but on 6 July they moved it to 1600, with "Superior Court" at 1630. -RG)
Sat 13 Jun Es ch 6 1034 EDT-- Wrestling. (PTA: NEast US, Canada.)
" " " ch 2 1052 EDT-- game show with 2 teams of 3 kids each. (PTA: " " ")
" " " ch 3 1130 EDT-- begin show with an artist. Produced by WIPP-49 (susp. WBSX)
" " " ch 3 1131 EDT-- show with Casey Kasem (one of several) (PTA: " " ")
" " " ch 2 1157 EDT-- College Bowl-type show with 2 teams of 3 students each (young adults, not children as at 1052 unid.)
Sun 14 Jun Es ch 2 1332 EDT-- Western movie with Walter Brennan. (PTA: NEast US)
" " " ch 2 1333 EDT-- Beethoven special with Peter Ustinov (PBS, susp. WGBH)
Mon 15 Jun Es ch 3 0900 EDT-- "Love Boat" (PTA for all 6/15 is E. US and Canada.)
" " " ch 2 0902 EDT-- "Home Shopping Club"
" " " ch 2 0916 EDT-- "Let's Make A Deal"
" " " ch 5 0927 EDT-- ad- "Empire Vision" (optical) (no listing in Toronto, Sudbury)
" " " ch 3 0930 EDT-- begin "World Alive" today's episode: "Beaver Pond"
" " " ch 2 2123 EDT-- Local Newsbreak. Box in UL reads "TV2 News" on top line, "Headlines" on bottom. OM anchor to right. Either a CBS or NBC affiliate as ABC was in the middle of Baseball.

Tue 16 Jun Es ch 6 1229 EDT-- Local ad with 886- exchange, then audio voice over on ID: (1129 CDT)
"Join Andrea Zinga today at noon" (not sure of spelling of last name) may have been WONT which was logged earlier. (PTA: Midwest US., the "today at noon" makes non-EDT certain)

(John, I hope you don't mind my changing time on CDT unids to EDT, which I did mainly to preserve my own sanity. I did make sure to add an hour when changing zones. -RG)

Randy Miltier, N6HMO, 1068 Fairview Ave. San Jose, CA. 95125.

1987: Mon 8 Jun Es ch 2 1036 EDT-- "Scrabble" (PTA: N Central US. KOTA-3 in.)
" " " ch 3 1134 EDT-- movie (KXMA-2 ND in)
" " " ch 6 1157 EDT-- "One Life To Live" (PTA: E.)
" " " ch 3 1442 EDT-- cartoons (KFME-4 ND in) (or do you mean KNSE-4 was in? KFME is ch 13 in Fargo, ND. -RG)
Tue 9 Jun Es ch 3 1750 EDT-- "M*A*S*H" (KXMA-2 ND in)
" " " ch 3 1800 EDT-- "Who's The Boss" (ABC, MDT. Possibly KOTA. -RG)
" " " ch 3 1925 EDT-- "Bill Graham Crusade" (KENW-3 NM in)
" " " ch 2 2018 EDT-- "INN News with Morton Dear" (KSNC-2 KS in) (KWON or KNMZ-RG)
" " " ch 2 2019 EDT-- "NBA Basketball Playoff" (KSNC-2 KS in)
" " " ch 3 2245 EDT-- "Dr. Gene Scott" (Let's find out who this is, it could be a great MS & Es target if we knew who it was. -RG)
Wed 10 Jun Es ch 2 1502 EDT-- soccer in Spanish. (KENW-3 NM in)
" " " ch 2 1509 EDT-- "The Jetsens" (KENW-3 NM in)
" " " ch 2 1531 EDT-- "Rambo" cartoon.
" " " ch 2 1610 EDT-- movie with old setting. (KNMZ-2 NM in)
Thu 11 Jun Es ch 3 1537 EDT-- SS cartoon with "goober ghost" characters. (PTA: SE.)
Wed 17 Jun Es ch 2 1602 EDT-- "CBS News with Dan Rather" (KFDX-3 in) (A very interesting unid, since no CBS are on 2 in TX or OK, and CDT CBSs would likely have local NX at time, WJBK had CBS nx at 1602 P (1902 E) but how many others would have it at 1902E instead of 1830E? this reminds me of a long night 6 years ago when I had an ABC, EDT station on 4. I'll never know if I had KELY or KOMI was this zero beat to KTVU?? -RG)
Wed 17 Jun Es ch 3 1631 EDT-- "Wheel Of Fortune" (KFDX-3 TX in)
" " " ch 6 1647 EDT-- "M*A*S*H"

(back to the ch 2 unid, I see that in my own log I have KENW-3 by Es at 1600P, so there may have been the clouds for 2Es at that time. KXMA doubtful as 1702M and vastly different heading. Even the closest CDT CBS, KGAN-2 IA, would be quite a haul. -RG)

YT One-watt stations all on 90.5 with mainly
country and ethnic (ke) format and calls
CKRW-granted to relay CHON 90.5 White-
horse-YT daytime only, with sign off to
co-owned CKRW (AM) Whitehorse, so that
CKRW AM can carry on alone at night
(CKRW only broadcasts at night)

YT Burwash Landing, Carcross, Mayo, Ross
River, Watson Lake ("downtown") and Upper
Liard (11 km west of Watson Lake).

How do I decide which translators to include
when I say "FM translators selected"? Well, I
try to select them from areas where I believe
"FCC-FM" column reporters and readers live.
Thus, the inclusion of the translator at Mayville
NY above, but the exclusion of several in
CO-UT-WY, where I have never received a
report from. Somebody asked what I meant by
"Contributions earnestly solicited. . . who's not
contributing?" I could name names, but choose
not to. I pick up some of the data from the DX
reports, and don't care really if contributors
send it in this column, or if they do so in the
reporting columns. There, it would be nice if all
reporters try to mention station formats heard,
nonIDs (not just slogan, multi-city IDs, and,
of utmost importance, if the station was heard
in STEREO! Many newer FM receivers, like the
Magnum FT-101, have stereo blend circuitry,
which takes away the penalty of added noise
when DXing in stereo. You still see that
beautiful red light, but don't hear static
stereo! Others can just flip to the stereo mode
to note its existence on a station, otherwise
DXing in mono.

Format Changes

Formats are the same as in the "FM Atlas"

AR Fort Smith KMA9 99.1 (country)

CA Eureka KRED-FM 92.3 k, automated

CA Longue Beach KBOB 92.7 (was b as KXCC)

ID Lewiston KLHS *88.9 r, "only broadcasts
from 8 a. m. to 2 p. m. during the high
school year. Their format is pure, unadulter-
ated Top 40."

ID Moscow KRFA *91.7 cj, "it simulcasts with
KFAE *89.1 Richland WA all but about 45
minutes out of the 24 hour broadcast day.

WPGC-FM, WHDG Not MD's Smartest Broadcasters?

KWSU AM 1250 also simulcasts the KRFA
signal from 8 a. m. to 3 p. m.; 4:30 to 7 and
8 to midnight." (Change KFAE to cj.)

ID Moscow KUOI *89.3 "album rock, jazz,
folk, reggae, African, ethnic, avant-garde,
electronic, punk, 'new-age', and talk. I guess
you can still call us a 'p'...We certainly
appreciate your fine coverage, especially of
small stations. . ."

MD Morningside WPGC-FM 95.5 sr, "a Jerry
Clifton-consulted mess of black AC records,
spiced with a few uptempo black selections,
even fewer white AC ballads, and very white
formatics" . . . "They were left at starting
block in mid-1980s when the didn't go with
the 'new' metal pop sound, to compete with
WRQX 107.3. In 1984 WAVA 105.1 switch-
ed from album rock to pop and have
monopolized ratings with WRQX. WPGC-
FM was left with a kind of half light and
half top 40 format. They had to make a
change and saw the mistake that WASH had
made with their ill-fated hybrid new wave
and black format of 1984-85. So WCLY
decided to make a different mistake! They
changed back to WPGC and have gone to a
black format. Only problem is they have no
black personality sound to go with it, and
WOJY 100.3 and WKYS 93.9 have that
market pretty well sown up. (In 1980s and
1970s WPGC was highly rated, with help
from daytime AM simulcast. They and
WEAM AM were the traditional top 40
powers in the DC.) (Wouldn't WHUR 96.3
(former WTOP-FM) be a top player in the
DC black market? b.a., with pun intended!)

MS Coldwater WVIM-FM 95.3 k, some coverage
into Memphis TN

MO St. Louis KYKY 90.1 features "no repeat
Tuesdays," in which no song is repeated for
the 24 hours

Multi-City IDentifications See FM- edia! for this

SCActivity, 57-92 kHz (See FMedia! for this feature)

KY Lexington WLEX-TV, channel 18, wants to
make use of its professional channel, centered
at 102.27 kHz on the audio carrier. It would be
used for remote cueing, with Modulation
Sciences making the gear, and referring the
customer to us because of a lack of receivers
for the pro channel. We will be modifying a
Radio Shack Portavision 60 radio with UHF
TV audio; this is the first station nationally
known to make use of its pro channel

LA Crowley KAJN 102.9 12 (intensive fre-
quency shift data) 87 kHz (not 100)

LA Hammond WKJN 103.3 no SCA (had
Mutual relay, 67 kHz)

TX Conroe KJOJ 106.9 no SCA (had 100, 67
kHz); adds Houston ID to main carrier, no
"J-107" nonID

TX Fort Worth KOJO 94.1 100 92 kHz (still 10
[physician's] news) 67 kHz; main channel

FCC-FM

still Spanish, contrary to rumors it had changed formats

TX Galveston KQKK ("kaw-coo-coo-kaw," the way they say it in Spanish on the main carrier) 106.5 67 kHz 1Y (Multicomm type data), 92 kHz 1U (tone)

TX Houston KTSU "90.9 92 kHz ethnic (probably Greek), no 67 kHz SCA; heard giving an illegal commercial on the main carrier for Mobil Com Radio Paging

TX Jacksonville KDOI 106.5 1U 92 kHz (no 67 kHz); ID on main carrier with Tyler-Longview, no more "K-1" nonID

UT Salt Lake City KLCY-FM 94.1 1R (lock) 92 kHz, as well as 1M 67 kHz

WI Holmen WKBH 105.5 1M, 67 kHz

BC Vancouver CJJR 93.7 1E (ethnic), Greek SCMO, assumed to be 67 kHz

Stations with SCA availability, looking for potential users
(Find this in July FMedia!)

AM Happenings Most Likely Caused by FM

"From Go-Go Boots and AM Radio to Reebok sneakers and Compact Disc (this Washington DC bank) has grown up with you." Ad talks about trends and fads, as if AM radio is a passing fad. Cited by Judith Gross in "Radio World" under the title "We Ain't Dead Yet," and saying the ad offends the nation's 4800-plus AM stations

FCC plans to examine AM engineering standards with the idea that the service must be improved to attract audiences from FM, and is responding to complaints that the band is too crowded and that there's limited frequency response. Proposed rulemaking expected to be released later this summer.

[There's more of these, including an item on cutbacks at WTOP-AM, but all of those items were found in last month's FMedia, plus news of two AM stations going off the air.]

FM Rulemakings, Proposed-FM Rulemakings, Finalized-This feature is about new FM channels being added to various cities—see it all in FMedia!

See Also July VUD for:

KS Dodge City KDCK 95.5 K-95 nonID (Coniglio, p. 22)

KS Lyons KSKU (calls changed from KLFQ) 106.1, ID with Hutchinson and format change to r (Coniglio, p. 22)

NE Hastings KEZH 101.5 questionable slogan change and possible format change from b (Richardson, p. 22). Note also several of his NE city of licenses are incorrect (Kearney for Grand Island, Grand Island for Kearney, misspelling of Hays KS); use of "FM Atlas" would help!

NE Lexington KRVN-FM 93.1 questionable format change to k (from m), Coniglio, p. 22

VA Strasburg WESI 104.9 Easy-105 nonID (Fala, p. 23)

MEXICO Net stereo on XEQ-FM 92.9 Mexico City (Laurin, p. 30)

Mexico DF XHFO 92.1 classical, not rock? (That was probably a Sunday anomaly, Laurin, p. 30). Power listed at 150,000 watts, which is probably a combining of horizontal and vertical effective radiated powers. Several other powers are given that way, and possibly represent washed-for facilities or staff's embellishments of much lower, in reality, powers. I would not change any powers using this list, and will personally wait for a new listing from the Mexico government before making any changes.

AM Radio to Improve? More Small-Print Happenings and FM Industry News

FM share of audience now 74 percent, according to the latest RADAR survey. Previously, it was 72 percent (for people 12 and over).

FM2 band proposal still alive. Radio New Jersey has asked FCC to reconsider its turn-down of request to allocate 225-230 mhz, citing no use of the band by the government.

Daytimers win; minorities lose. Court supports FCC's awarding of daytime AM station preferences for new Docket 80-90 FM stations over the needs of minorities, saying...

—and there's more in FMedia! including a continuing report on Pacifica and obscenity, FMX developments, fairness doctrine legislation veto by President Reagan, news from the National Association of Broadcasters, as well as "From the classifieds." From "Monitoring Times" is a proposal to the FCC to allow legal unlicensed FM stations at up to 10 watts, with stations from 92-108 on the dial allowed to be commercial, with Columnist Scott McClellan quoted in FMedia! "There are a lot of talented people with very creative minds who do not have the opportunity to show what they can do behind the mike. Even if hired by a commercial station, they must remain within the narrow format dictated by station management. They end up frustrated, and often find something else to do for a living. A few start pirate stations. The pirates I know who broadcast just for the sake of breaking the law have been few." This might be a good time to go to your copy of the "FM Atlas" (10th edition) and read the section on FM Piracy, pp. 9-10—b.a. FM Atlas, 10th edition, still available at \$9.50 from me at above address, or Adolph MN 55701-0024.

Also in FMedia! Read the feature under the title, "FM broadcasting will replace AM broadcasting, entirely within eight to ten years," and find out who said that and when. And the long-promised article, "The History of WMCA-FM New York" is published, with writing by Michael Collins and Dr. Al Germond. Tim Hendel gives a history of the Rural Radio Network in upstate NY, and there is FM Forum. All that appears in the July issue. The June issue, which was rather heavily promoted in last month's VUD, is out of print. Most months I am only printing a very few copies above the number of subscriptions, to keep the supply low and the ultimate price of back issues high.

Readers' Reports

I thank John Zondio for clarification of the KJYO call letters' mystery; I think it was Frank Merrill who thought he heard it as "KQYO," and Gus Mancuso for many DC and MO contributions (above). He asks, "Why all the hoopla over multi-city ID? Does anyone remember that 1520 AM in NJ (now WIBG) has been using 'Ocean City-Somers Point' ID for over 20 years?" Gus includes a sticker with this poem on his envelope:

*KINDNESS
I shall pass through this world but once,
if, therefore, there be any kindness I can show,
or any good thing I can do, let me do it now;
for me not to defer it or neglect it,
for I shall not pass this way again.*

Gretel
Richard Reese heard KWZD 103.7 Hamlin TX, "Wizard 104," k, but did not get a chance to monitor to see if it is stereo; if anyone knows, write and let all of us know. His other contributions will be in next month's VUD.

August, 1987

Glenn Hauser sent an item about one of my SCA customers, A. K. Mungal, Houston, who is running an SCA on the 92 kHz of KPFT '90.1 Houston. Programming is mainly East Indian, but includes other Asiatic programming, such as Bangladesh, Afghanistan and Sri Lanka. Less than 2,000 out of some 16,000 Houston residents who are in those ethnic groups subscribe. Mungal could have been responsible for the '90.9 Houston SCA, which I thought was Greek, but could have been some other ethnic service. Mungal plans to expand to 10 cities, including New York, Chicago and Los Angeles, so those of you with extra-legal detectors (especially for 92 kHz), tune in and be among the first to experience this service—and let us know what you hear. He also sent some radio formatrics from Dave Gleason in PR, which will probably be printed next month. Glenn says: "I was going to tell you all about WXDJ 95.7, but I see someone beat me to that. Still no sign of it since the test reported which I also heard. I wonder why you don't publish specific dates of starts/ends (I usually don't know those, Glenn—b.a.). VUD in today; don't you think your promotion of FMedia is a bit overdone?" (You're right, Glenn, and you'll note how I employed restraint in promoting FMedia the FM radio newsletter, in this column—b.a.) Glenn DXed a station in Tuxtla Gutierrez CH, Mexico, "which is not in the Atlas—XHTGZ on 96.1; station on 96.9 not audible. I assume you would not be interested in their slogan—oh, what the heck, Estereo Grande. Guess it's \$ if you'll pardon the symbol. Enjoyed FMedia issue No. 6; hope this is in time for No. 7."

Reporting improved reception of WJSL '90.3 Houghton NY is Dave Nieman, and they sneaked through a facilities improvement to 6000 hz; 66 m without my noticing! Dave also claims WBYR 107.7 Wethersfield seems to be using a shorter tower with more bays; however, there's been no facilities change grant, or even one applied for by them. Dave is one of several who is coming to the convention in MN. Dave sent along an article from Knight-Ridder newspapers, "AM Radio Stations Begin to Give Static Some Static," quoting Michael Rau, NAB engineering, who said without improvements, like new standards for lights and appliances, "there may not be any AM listening in the future, because the whole band might be a giant buzz." Others point out to poor AM receivers, and the article mentions Group W AM stations embracing stereo, but in the case of KYW AM Philadelphia, carrying no music.

Tom Cornell was nice enough to write about two subscribers on WWK1 100.5 Kokomo IN. He did not hear them, but heard about them through a co-worker.

"For Jupiter FL 96.7 being the call-change champ, what about St. Johns MI 92.1?" muses Frank Merrill. "I don't even know all the calls they've had, but I think at least six or seven. And they started as WJUD-FM in the old days. . . and you voted FOR the FCC deregulating Ks and Ws? What's wrong with you?"

Finally, Walter Patton came through with CRTC notices and decisions, after spending much time in the Metro Toronto reference library, and I really appreciate his doing this. He says "The CRTC is now operating a computer bulletin board through Telecom Canada's iNet 2000 which is available through Telenet in the U.S. It will allow access to decisions and notices as well as searches of files, but the charges (iNet 2000—the CRTC info is free) are \$50 connect, \$3/month, and \$.25/minute connect time which could really add up. More information is available from the CRTC."

Wait then listed some temporary stations the CRTC approved for special events: AT Banff 100.1, 101.5, 106.7, 107.9, each with .22 watts, "on different hills during competition." BC Vancouver 94.5, 1 w for "Carol Ships" at Christmas, and Church Point NS 102.1 10 w for "special French language events between July and October 1987 only." 73, 5/1/87

NORTHERN FM-DX

AUGUST 1987

June was an outstanding Es month with many DXers reporting excellent results, including a good number of loggings in the 1300-1600 mile range and one logging at 1834 miles. Hopefully things will continue like this thru July.....

JOHN EBELING's report, continued.....

COMMENTS: The California station I logged was so steady and weak (it was in for over 5 minutes) that I thought it was tropo - was I surprised when I heard the ID. Being so weak, it was probably double-hop Es. As you can note by the report, Es had died out an hour before. Guess it just goes to prove to never give up too quickly after an Es opening; you just really never know.

MIKE BUGAJ - 69 SHERMAN ROAD - ENFIELD, CT. - 06082

COMMENTS: Super month of Es (a good amount of which I missed) and some real nice Tropis! Tropis of 6/18 were poorly timed as I had to be up at 4AM and didn't get to sleep 'til 1AM. Oh well, I'm not complaining now!!! 6/13 Es had ID tape running and got legal of KNGM but couldn't hear calls, but could hear city. Dir. assistance helped out and I called 'em to verify. The girl was shocked. They're 4714 watts and have been XMTNG the G since 2/87....sent two diff B. Stix. Early Es of 6/14 were most strange... MUF would shoot up to 100 mHz+ then drop below CH 4, then up again!!! Second half of opening was SUPER STRONG and steady. Woke on 6/22 to find nearly every station between CT and northern VT coming in like locals!! Hauled in two toughies on real bad semi-local frequencies. The Es of 6/29 was unlike any I've EVER seen (in two years).

***** THAT WAS FUN!! *****

-----> CONTINUED ----->

BILL NOLLMAN's report, continued....

The first two Wichita Falls, TX stations were the ONLY ones heard. Then they disappeared. While on the phone with Joe Fela, we pulled out KQZY-105.3 Dallas which was strong as bricks in NJ but weaker than a XLTR on a local frequency in Bozrah...but it was definitely them!!! Then it all came in SOLID and STRONG. One strange thing, though, there was hardly ANY skip BELOW 100 mHz... Weird. I'd love to hear an explanation to this. And to end the eve on a great note, the peninsula of VA decided to duct on in. TOTALS now at 474...look out 500, maybe in the next Es...

02 Es

An excellent Es opening - although most of my
time was spent on TV. Lasted 7 hours and MUF
got up to 144 mHz 2 meters FM. Lasted past
2 AM when I went to bed - channel 5 was still
smokin in!!!

COMMENTS: It has been a wild and woolly month
with many good Es openings and even a few nice
tropes. 60 new FMs logged including MONTANA for
a new state. Quite a few call changes logged,
too. Hope to have more next month, conditions
permitting.

DAVE NIEMAN - AKRON, N.Y. - 14001-9529

COMMENTS: June 29th was the best E-skip day
I've ever seen. It went all the way to
107.9, and it lasted at least four hours.
Many locals were eliminated by the skip.
I missed half of it (I was not near a radio
from 7 PM - 8:15 PM), but I still logged
32 new stations, more than in any other
single Es. I just wish I could've heard
the whole thing. I hope everyone else could
hear it, too.

LOCAL NOTES: CJEZ-97.3 Toronto is on the
air. They seem more (m) than (b). WBEN-
102.5 Buffalo (105,000 watts) has changed
to WMJQ - Majic 102 (no, that's not my
spelling; that's how they promote it, with
a "j"). (WMJ-105.7 Cleveland also spells
it that way -jf).

ODDS AND ENDS

Reporters are reminded that unIDed catches
should really be sent to the CCI COLUMN. If
you include them in your report, I may (or
may not) run them. I can only guarantee
I'll run those which I can personally ID.
I also suggest that you include formats and
slogans in your reports. It can help others
with their unIDs.

Another call change: WM00-105.5 Berryville,
VA is now WAPP, and it's new slogan is
"APPLE COUNTRY".

Two more directional stations are WJBR-99.5
Wilmington, DE and WRTI-90.1 Philadelphia.
WJBR protects the Allentown area (their
parent company owns WAEB-104.1 there and one
cannot own two stations in the same market
per the FCC). WRTI-90.1 protects WOEL-89.9
Elkton, MD. This is a bit strange as WOEL
has only been on a relatively few years.
However, when WRTI moved to the Philly
antenna farm, they were obligated to go DA.
As a "P.S.", WRTI is now unhappy with its
signal in the Wilmington area and is looking
for a frequency for a translator.

WYNY-97.1 went country on July 1st as
scheduled (replaced the k of WHN-1050 which
became WFAN and went all sports). WYNY
calls itself "COUNTRY 97".

COMMENTS:

-The 14th received while driving in Liverpool, NY.
-The 15th of June proved to be a rather unusual day with FM skip starting around 10:30 AM and continuing to near 9:30 PM. Most notable was the "double opening" around 8:10 PM when FL and IA were coming in at near equal strength (FL faded quite rapidly).
-The 21st was an unusual opening as well, starting out very normal in Texas (if Es can be called normal) and then abruptly shooting to the north; all the way to Manitoba, CANADA. This is the first time I have tracked Es this far north.

- And finally the 29th opening was a biggy, hard hitting but short lived as well. I worked this opening at Radio Shack (Northern Lights Mall, N.Syracuse). This opening was also attended by and worked (when I was working with customers) by Sam Brown, operations manager of WEZG/WXRA Syracuse. Most notable was the strength of two stations: KMJQ Houston which lasted 3 1/2 hours and KYKZ, KIX-96, who for a period of time around 8:50 appeared to be as strong as the local stations on the signal meter. Some of the strongest skip I have ever seen, and no doubt the strongest skip this year.

-Kurt

All stations logged were in Stereo.

COMMENTS: Haven't done much DXing lately, since I've been busy with work and other projects. But the start of the Es season and improved tr conditions during most of Memorial Day weekend brought me back to the dials. Three things combined were responsible for the great number of stations received on 5/25: the warm front which set up the DX: it was a Monday morning and many locals and semi-locals were off the air: and it was a holiday (I can't be up at 4 AM on a work day). In my report I've only included relogs of stations not normally received here. Many IA and southern WI stations were in, but most of them come in regularly during the Summer months.

Es hit channel 2 every day from 6/7-6/17. From 6/7-13 the Es would briefly make it to FM, but not long enough to ID anything. However, there was Es on FM every evening from 6/14-6/17, from the same area every day: northern FL and southern GA, and the Gulf Coast. Many stations logged had been seen in previous years. Tr was good on the mornings of 6/12, 13, and 14, but I stuck to DXing UHF TV for the most part.

I will be attending the convention, since I live a short distance from Duluth. If I see more DX, I will send in another report.

73s, Pat

P.S. As I'm mailing this letter (11 a.m. 6/25) Es is in strong from TX. More in my next report.

(Welcome to the column, Pat. You should consider a rotor and a good FM only antenna for your DXing. I'm sure that would improve your already good results. -jf)

COMMENTS: I've just rejoined WTFDA and this is my first FM report in a long time. I'm glad to see we now have a full time editor for Northern FM DX. I really haven't had a lot of new loggings since my last report, so I decided to start off reporting again from the beginning of June. I hope everyone is finding some good FM skip this Summer. I'm probably missing some of the best openings because of my evening work schedule. Anyhow my total, from this location, is now 1107; (after 17 years).

I really appreciate fellow DXer Ralph Strobel keeping me informed of what's been going on with WTFDA while I was away. He certainly has some impressive loggings despite many strong local stations in his area. (Wish I could afford a McIntosh.....) (MR-78's are going for about \$850 used these days. And welcome back. -jf)

| ?? | 100.3 | | Unknown station with rock music, slogan as Z-100. (There were a couple of Z-100 people over the house a couple of weeks ago, namely Paul Mount and "Spanky" MacFarland - should've shown 'em this - it's WHZT alias Newark, NJ, really NYC.-jf) | | |

NOTE: WJMJ also broadcasts on 91.5 Hamden and 107.1 New Haven. (via translators -jf) Plus I've gotten what I believe is a pirate station. It's on most Thursday nights between 1900-0000 (Midnight). Refers to itself as a private radio station and an INDEPENDENT STATION. Calls itself WSHR (LAURAWOOD RADIO) on the freq. of 96.5. WSHR says they are a 1 watt station with antenna less than 10 ft. and serves the Milford/Hopkinton/Bellingham, MA area. But I get it fuzzy but good most of the time. Says it's the only station in LAURAWOOD. (Welcome to the column, William. -jf)

73s, Joe

SOUTHERN FM DX

Danny Buntin
1312 N. Skyline
Stillwater, OK 74075

AUGUST 1987

DEADLINE: 10th

For DX reporters from: AL, AR, AZ, CA, CO, DE, FL, GA, KS, KY, LA, MD, MO, MS, NC, NM, NV, OK, SC, TN, TX, UT, VA & WV. Also DC.

Es BOOMS BIG IN JUNE!

While the early going part of this year's skip season appeared ominously luckluster, June dispelled any concerns about another mediocre skip season and turned out to be quite a blockbuster month for some reporters. At least a couple of reporters including your SPM editor would call this June one of the most active Junes ever for skip. Meantime, June trop activity was conspicuously lacking but with the main exception being with the DC area DXers having a good time with the trop. DX reports have been coming in at a fast clip, so without any further ado, on with them.

Tom Yingling, Jr., 221 Pinewood Rd., Baltimore, MD 21222-2345

Just E-skip reported this time, as I don't bother much with FM trop due to so many locals. Anyway, I dot some good FM skip in, that seem a little better than last year. I mostly DX TV, but this year it got up to FM for once. Receiver is a Pioneer TX-9100 with SCA built in. Antenna is a Channel-Master Probe 9 at about 45 feet. All times are in 24 hr. EDT.

Chris Johnson, 3357 Ridgeway Sq., Memphis, TN 38115

I am a new contributor to the column, although I have been a member for a few years. I never have really sat don and made myself DX FM for a few reasons--mainly: living in an apartment, lack of any exceptional equipment, 3 blocks away from an FM transmitter, lack of patience (AM DX has been my forte). Two weeks ago I thought I'd give it another shot (one last effort). I used nothing but my GE Superadio and a pair of headphones. Here's what happened:

6/14 Es
1058 WJQY 106.7 FL Ft. Lauderdale, ID, nx
1202 unID 96.7 AZ? mentions of Scottsdale
I couldn't believe it! This renews my faith in FM DX! I hope now to be a regular contributor. Happy DX to all, 73

Matt Sittel, 220 Brookfield Dr., Kingsport, TN 37663

May has been a super DX month! Lots of tropes, but none spectacular. I found 3 regulars on 103.3 on 5/30 WAKG in Danville, VA 171 mi., WTCR in Huntington, WV 142, and WVEE in Atlanta, GA 216 (V103). Like 104.3, it's interesting to see which is in most! Whereas on 104.3 it's WBBQ, it's WAKG in most often on 103.3! Great to hear #-skip again, as brief as it was! Interestingly, although Texas is my most popular DX catch, the first station logged the past 2 years via Es was not TX! Last year, MN--this year. KS!

WZLI & WRBQ signals up alightly
1102 tried 95.5, expecting KZFM-got WNGC ID
1103 WQXI 94.1 GA Sayrna, J 206

I hope everyone else's June DX was as incredible as mine! FM Es was in a record 12 times this month-and was the best on 6/29 with the incredible opening-the MUF stayed close to FM all afternoon, and got through occasionally-and at 1540 I thought Es was out for good that day-then it came back at 1728-then out at 1752-then I thought it was out again-then it literally destroyed the dial as it powered past 108 MHz in 5 minutes, from 1800 to 1805, and peaked at channel 8 at 1840. Then it was super all night long-I called KQKY and KTRS both to say I was listening. The DJ at KQKY really didn't believe me until I told him what they were playing. The guy at KTRS was thrilled/ I was listening to it. when he said he wanted to say hello to people in NC and Johnson City, TN (I wish I knew who that was-its only 10 miles away) so then I thought I should call. Someone in Manchester, KY called-and I helped him ID KSDZ/Then the DJ said he wished there was an organization for FM DX-AHA!! I gave him the WFTDA address-maybe he'll join-who knows? 6/29 was not the only opening this month-6/2 was fantastic, too-a new province for me, 6/10 was very good-no fading-but very short-lived, 6/21 brought in my 30th state with IA. 6/3, 6/5, 6/25 good, too. Lately, when FM Es has been in, 94.1 WQXI keeps coming in-and very strong, too. It even blocks some Es from getting in. I wish I knew why it kept coming in. Also, with my recent trip to Canada and all this super Es, I've got a ton of ID's-I expect I'll have a new ID tape soon-if you'd like a copy, you can (preferably) trade a similar ID tape or a soul or CHR station. Or you can send a tape with \$1 postage (thanks to Bill Nollman for idea), or if you don't have a tape to trade or send, you can send a check for \$3 to cover tape cost and postage. Good DX to everybody & 73's.

I have logged more newies(21) in the last 36 days than I had in the previous 3 1/2 years. My log stands at 151 heard, only 45 of which were heard in my neighborhood, which is "God's Country" as a place to live, but the "Depths of Hell" as far as any serious FM DXing is concerned due to the close proximity of several FM transmitters causing a wasteland of image overload. Many mornings this spring I take my trusty Portavision 40 or 55 to work at Marlow Heights, MD, 7 mi. se of the capitol Dome and 12 mi. SE of my apartment building. I work as a computer programmer for the Nat. WX Service(don't blame me for the crummy wx, hi) in Marlow Heights next to WTR 104.1's studios(its xr is 16 mi. south). I often DX for 20 to 30 minutes or more in the morning just outside my office building before I go upstairs to work. I've had a ball with that Portavision 40. That's \$40 well spent. 73's.

Gus Moncuso, 5615 Inwood St., Cheverly, MD 20785

Got incredible am trop on 6/18. Balt.-DC area gets signal enhancement on sunny am's due to presence of Chesapeake Bay. (But morning signal enhancement is normal every where with or without a bay, DB.) It usually peaks 0700 to 0800, but was full strength at 0600 despite only 20-25 minutes sunlight on bay. Many se VA stations rec'd with little or no adj. chan. int. from high power DC locals 10 miles away. Example: WPLZ 99.3 Petersburg, VA rec'd loud and clear between 47 kw WHFS 22 mi. away easy and 21 kw WDAY 10 mi. to west. Two catches even drowned out Balto semi-locals. I noticed Joe Fela of NJ had some experience with Balto. stations coming in over NYC.

To save time I looked in guide for Tidewater area freqs., then tuned to those spots and, behold, there they were. New stations found were down Carolina coast and over 100 miles inland along VA NC border. All this done on my #2 receiver, a Pioneer, definitely inferior select. wise to #1 Technics. (Both have .05 incrementation).

The skip catch was made on car radio north of DC, putting extra miles between me and WFVA(VA) and WROL(NC). I noticed as I went under a bridge, signal cut off and on instantly like someone hitting light switch. Scanned dial at home later with no results.

Finally made trip to WV and DXed from atop a small mtn. Set up on sm. table on man's lawn, plugged into socket on outside of house. Had clouds and rain both days there. Reception good though, furthest catch, Toledo, almost 250 mi. away. Most surprising was gain at the place we actually were staying, a few mi. away. It was in a deep valley between 2 ridges of peaks about 500 feet high. Best catch: Cleveland about 200 mi. away. This spot is spot is so bad you can't even pull in locals (15 miles) clearly on a single ant. portable. (Then how did you get Cleveland? DB)

Tim McVey, 9348 Cherry Hill Rd. #705, College Park, MD 20740 EDT

Equipt: JVC JT-V22 am/fm tuner, Pioneer F-5 AM/FM tuner w/SCA, quad loop antenna with reflector.

Nice to be able to live in the city and still get skip! I am located on the 7th floor of an apartment bldg., which gives excellent reception to SE. This means Richmond(110 mi.) and Norfolk area(160) out to WMYK 93.7(200) are regulars, but because of nearby buildings, SW, W and E are tough. (Can't even receive WBMW Manassas, VA clearly.) Very rarely hear Philadelphia, only 85 miles NE! (Re-logs and "groundwave" loggings omitted from report. Tr on 6/15 and 6/18 actually diffraction off of strong cold fronts, rather than a duct. 73.

At 2135 phone call from Baltimore DXer Tom
Yingling, who was hearing most of what I had
except that his MUF was 107.9. Listened to
WYNN over the phone while my 101.5 was dead.

Finally, it did come in weakly here.

John Jefferson, 4016 Crest Ct., Pleasanton, CA 94566

So far '87 is a great year, so I guess I'd better get reporting before this letter gets out of hand! To start off, went bust in January for the 1st time since '75 and in April for the 1st time since '78. May produced no skip loggings, so things didn't look good entering June. 20 loggings on 6/8 fixed that! Anyway, as always, underlined are new (to bay area); dashed underline indicates new mode; @ indicates new to Pleasanton only. Except as noted, all loggings were made here in Pleasanton with the two Mac MR80's I now own: one on the S-Probe 9 at 55' and the other on the Winegard at 15' (the latter denoted by #).

A couple of notes: KCGN logged on grounds that they in fact broadcast the program heard, and they and KAMB Merced are the only stations of any format broadcasting on 101.5 with xlaters on 106.3. What I heard was over KAMB. (And I don't think their 106.3 xlator ever got on.) Besides the lecture, music heard before the hour on 101.5 // 106.3. The xlator is not credited as a logging: K292DE Willmar MN could also have been the one heard.

Sonido Cosmico is known to be KXMK; I heard them in AZ last October. The mixing with KQNC was a problem there, too.

Didn't think I'd ever again log 20 stations in a day here in the bay area. Hadn't logged 20 in one month since 6/83! Totals stand at 904 for the bay area and 810 here in Pleasanton. I trust the season is treating everyone this well.

QUESTION: I have been writing to HQ for a year asking where to send questions, comments, etc., never get answer. Also what are addresses of Pop. Comm. & Monitoring Times? Gus.

ANSWER: Previous VUD's may answer you. For one thing, please send SASE to WTFDA.

MORE REPORTS CONTINUE!

(See March VUD, p. 15.)

For a time it was looking like another mediocre skip season shaping up, by mid-June the skip season made a turning point when a strong trend for longer lasting openings and higher MUF's finally established itself. In fact, things got so good it persuaded me to go back searching old records and found this was the best June since 1975 based on quantity of loggings. Maybe, it would have been my best June, if I didn't have to work most mornings. I wonder if the Es upsurge is related to the current phase of the sunspot cycle. Skip sigs sometimes got very strong--60 db, which is equal in strength to the 3 semi-locals from Tulsa on a high tower about 55 mi. to the west.

It was great to hear from Maine, the last heard of the 48 contiguous states, for the first time since 1982. And it was a treat to hear from Chicago for the first time ever.

The rainy season here, which is sometimes associated with mega trop arrived a month later than usual this year. So far it has mainly succeeded in creating a bumper crop of mosquitoes. Would love some super trop for a change like of the caliber from the early 80's.

Well, thanks, for all the reports. To the rest, don't be selfish please send in your report today, so we can get a more comprehensive idea on how the season is going, 73.

WESTERN TV-DX

Fred McCormack
Box 5221
State University Sta.
Fargo, ND 58105

Deadline: 9- 3-87

August 1987

It is a massive column this month; I believe the most pages ever. All reporters seem to be satisfied that June was an exceptional month for E skip. At least one reporter identified stations via E skip on every single day of the month. June 29 was perhaps the most exceptional day, prompting Frank Merrill to observe with regard to that opening that "even high band E skip wouldn't surprise me." Well, Frank predicted that one well, as your editor noted over an hour of intermittent E skip on high band channels 7, 8, and 9. The details are in my report (don't rush to read it - sadly, there were no ID's). Frank noted E skip CCI on channel 9 at his QTH on June 20.

The extensive reports of E skip loggings overshadow tropo loggings, but some exceptional loggings were reported on June 7th and 8th by the Illinois DX'ers at distances out to 800 miles on UHF.

---SPECIAL MESSAGE CONCERNING COLUMN REPORTING---

I would prefer to use all the space in this column to report DX occurrences, but I feel that I must comment on some of the responses received from reporters regarding the establishment of a 60 day cut-off for DX reports. To say that this policy was not well received would be an understatement! The responses ranged from one reporter's rambling three page tirade against the policy coupled with a plea to "PLEASE consider giving us workaholics some flexibility?" (emphasis was that of the reporter) to an apparent indication from another reporter that the new policy will likely eliminate him as a column contributor due to a shortage of time during hot DX periods. In the words of that reporter, "It would be the height of idiocy to have to spend time writing up a report during the midst of an ongoing opening just to meet a column deadline."

While I am confident that no offense was intended by the first reporter, it is hard for this editor not to note the inference that the reporter is a workaholic and this editor is not. While I certainly do not aspire to the workaholic designation, I would suggest that my schedule is a hectic one. That is reflected, I believe, in the brevity of my DX loggings - in fact, in marked contrast to the prolific loggings of my workaholic critic.

To the second reporter, I must say that I couldn't agree more. I wouldn't break away in the midst of an ongoing opening to prepare a DX report, but I wouldn't cry about missing the reporting deadline, particularly if it was a 60 day window. I would recognize that I had traded some DX time for seeing some of my outdated loggings in print, and after all, isn't DX'ing what it is all about? As a column editor I don't have that option. I have left strong, in progress, DX openings to prepare this column. I see that as my obligation, and if I do not carry it out, you reporters and readers would have justifiable reason to criticize my performance. Isn't it fair that reporters also face a measure of responsibility in order to qualify as contributors to this column? I think so.

It was indeed my own interest that was foremost in my mind when I established the cut-off policy. I wanted to smooth my workload to the greatest degree allowed by the variability of DX conditions, but I will suggest that, aside from the potential benefits to me, the readers of this column will benefit by finding current DX news in each month's bulletins. Let anyone feel that this policy was developed without consultation, I must point out that it was done with the full concurrence of the editor of the VUD.

I want to make it as easy as possible for everyone to report to this column, but there must be rules. It is my belief that the downfall of a good DX reporter is getting into the habit of waiting until deadline to prepare each report in hope that some super DX will occur. Then it does, the DX'er is swamped, and the deadline is missed. It would seem with a 60 day reporting period this would not be a problem, but it apparently is. How about submitting a report EARLY? You can always submit another up until deadline. I have no problem combining them, and you do not fall behind.

It was pointed out to me that a 60 day cut-off calculated against the floating deadline of this column makes it impossible for a reporter to know ahead of time how much of his older DX can be submitted in the future. I think the reporter was justified in his criticism of that aspect of the cut-off; so I will change it.

THEREFORE, from this column forward, please note the following NEW rules. The cut-off date will not be 60 (or 61 days) prior to the column deadline date, but will be the first of the month FOUR months prior to the cover date of the VUD in which it will appear. Yes, I have increased the cut-off date to 90 (approximately) days prior to deadline. Who says I am not a nice guy! However, in no way should this be interpreted as approval of 90 day old DX reports. Please stay current!

Additionally, I APPEAL to you to submit your reports in a readable format. It would seem that with the format of this column's display of your loggings so firmly established, submitted reports would tend to be prepared in a similar format. Some of you don't even

Western TV DX

August 1987

come close to that. You can not believe how much I appreciate those who do. I will not attempt to require any particular format for reporting, but it is common courtesy to keep it neat. It is a testimonial, I believe, to your editor's patience that I have strained to decipher all manner of scrawled data from certain reporters. PLEASE SHAPE UP.

To those reporters who have always complied with good reporting practices, I apologize for devoting so much space to addressing those who have found it difficult. Perhaps I have been at this too long. Maybe I have become too cranky. I will be happy to relinquish the editorship of Western TV-DX to any individual found acceptable by the publisher of the VUD. If you are interested, please contact Bill Thompson at the WITDA headquarters address.

On another subject, this column includes a number of testimonials to the excellence of the Television Data Base which Bill Fahber recently prepared and expressions of appreciation for the work which he has done for the WITDA. I join in those endorsements and urge every TV DX'er to order a copy from headquarters.

First, the solution and/or resolution of some old mysteries:

10/28/86 tr @ 0630 - W59AD, Andrews NC 560? Thank you, Matt Sittel, for solving this! He matched my programming with them and the North Carolina ETV slide he drew looked like what I saw. Somebody suggested WEIU-51 mixing with WRSP-55 (which I DID note at a later date), but I quickly realized they don't carry AM weather and aerobics at this time. This is another example of the "waveguide" effect I've mentioned a couple of times, because this is south of Knoxville, but my antenna bearing had been slightly NORTH of Knoxville 26.

11/28/86 tr @ 0815 - K69BS, Mullin TX 780 KTBC-7 'fessed up a long time ago that they had run the two local ads I saw. Mullin translates KTBC, probably by microwave - I doubt they would've separated KTBC with an off-air antenna that day.

11/28/86 tr @ 0903 - K63AY, Mullin TX ??? Forget it! Tracking down a "jewelry store ad" on whatever channel 12 they were getting in lieu of KXKS (KXII?, KODE?, KWCH?, WBNG?, hi) would not only be tough, but how to do it without looking like a basket case? Unlike K69BS, this ad was inspecific. I know it was K63AY (it even faded in unison with K69BS), but I can't solve or count it. Why weren't channels 65 and 67 there? Maybe the local engineer shut them down when he couldn't get the required stations with any watchable signals.

11/28/86 tr @ 1651 - W63##, ??? ? ? ? This testcard with "Channel 63" in the middle and apparent tiny ID on the bottom is still mysterious. I am still counting this because I feel that SOMEBODY knows what it was, an LPTV, not a translator. PTA: PA/MD/DE/NJ, southern NY, southern CT/RI. Or could this be a translator unable to receive its primary and putting up an ID card instead?

11/28/86 tr @ 1711 - W60##, ??? ? ? ? As I suspected before, there really is no way to resolve this, so I've scratched it.

11/30/86 tr @ 0426 - K45## ??? ? ? ? All-night country music videos - I still suspect Jonesboro, AR. Anybody know?

Now, on to the recent activity - it's been busy:

Note # 1 - FINALLY, after many tries! This one doesn't get out at all. Religious (TBN). They had a full fledged "sign-off" type announcement, but stayed on!

Note # 2 - "60 Minutes" on a three hour delay. This is the closest (to KNAZ) of several possibilities. Losing this one hurt.

Note # 3 - While CKGW had ATV News, the mystery had an ad for St. John / Fredericton / Woodstock and one or two other New Brunswick cities in English. Is there something new up there?

Note # 4 - I've never seen this listed before! They run their ID'ed color bars for a long time, perhaps all night.

Note # 5 - Both were running CBC Phillips test patterns, but one said "Montreal" and "SRC/CBC" while the other said "Quebec" and "Radio-Canada."

Note # 6 - Seen with "TVA" ID slide. No other local ID for this at the top of this hour.

Note # 7 - There were two simultaneous "Radio Canada - Manitoba" ID's seesawing here. I consider this instead of Flin Flon, closer to CBWFT and the skip area, more powerful (if that's the right word, hi), and I would've had some upper Saskatchewan like Melfort or Prince Albert if Flin Flon had been coming in.

Note # 8 - This was zero offset and had CBS earlier, while KXLF did. Really unlikely anything else, but I want something definite, and it shouldn't be too hard to see this one eventually.

Note # 9 - In parallel with the CBMT feed on ANIK-D satellite. There aren't many stations on satellite that are unscrambled, so it is rare to be able to check for parallels. However, this method worked handsomely on June 5 for Canadian FM E skip.

Frank Merrill (continued)

Note #10 - At first I had listed as CIII tentative. I had several Kitchener mentions and zero beat to WLBZ, and further checking indeed shows this with the correct offset, and their primary station is in Kitchener. A nice surprise, my first short skip in several years, and I'd totally forgotten that this station existed!

This does indeed look like an excellent E skip season! My earliest season E skip ever (in fact, the first 3 dates are my earliest ever) and already more E skip than I saw in all of 1984, and I was out of town the last half of May. Even I am surprised at some of the "gimme" stations (such as WEDU-3, CKCK-2, WTVJ-4, KTVQ-2, etc.) that I still needed, but I moved here after the 1985 E skip season and was in the Arctic area almost the entire 1986 season, so now I'm playing "catch-up."

I still don't have as much E skip as would be expected for totals around 700, but it's getting there. One aid will be getting my own QTH and getting "skip antennas" up that are not 80 feet in the air. Jeff has gotten WDAY-6, ND, and some other stuff while I was on the phone with him, while my high horizontally polarized antenna couldn't get me past KWQC, etc.

Now that I finally re-found my WFTDA translator book, I'm all ready again to resume my "bookkeeping," which is a year in arrears. It'll be nice knowing my totals again. Other than hunting for my own home and getting really busy with records, I should be around for the E skip season up to the end of July. I hope everybody is adding to their log as this E skip "beginner" is.

Frank Merrill (continued)

Note # 1 - 6/13 @ 1829 - This was my most wanted E skip to the east, because at 290 miles, from Ohio, it had been my nearest unlogged full service station.
 Note # 2 - 6/14 @ 0427 - I always wondered whether I'd ever initially log a translator by seeing its "phantom." Am I correct to still count it on channel 60? (I would think so. fm) Strong CCI from it on channel 60, also, but always impossible due to K60CL (40 miles). I suspect the primary was carrying KWWL.
 Note # 3 - John Comb's DX distance printout (another DX'ers must have!) shows transmitter in Rhode Island, so I guess it counts as Rhode Island, then?? (Whichever. fm)
 Note # 4 - 6/15 @ 0230 to 0330 - Intermittent "translator-type" non-standard CCI on chs 3 and 4, at 0253 saw ABC logo on ch 3, suspect translator such as K03FK, Idaho.
 Note # 5 - 6/17 @ 0917 - On April 30, 1986, I saw a "CBC Gaspeie" which I supposed was CBST-2 at the time. I had no logbook showing CBGAT14 to exist. The latter is much more logical, as CBGAT, the parent station, is in Matane, on the Gaspe Peninsula. Therefore, I've changed my log and consider this to be a relog.
 Note # 6 - 6/17 @ 0936 to 1030+ - Besides CBFT, another station had unid color bars and yet another station had ID'd color bars with apparent ID in the lower right and something that looked like "FM Ondes 10:00" in large letters upon the color bars. This one was in and out but never seen for more than a split-second at a time, so I never could read it.
 Note # 7 - 6/17 @ 1733 - I was going to phone KFYR's control to ask if they could stick their logo on the side briefly, but it faded before I could call them up.
 Note # 8 - 6/19 @ 1507 - Is this Queretaro or Guanajuato? I've seen it listed both ways. (If it isn't Queretaro, then the map showing Zamorano which I sent to Jeff Kadet is wrong. I believe it to be the primary XEW station for the city of Queretaro. fm)

(Regarding the Television Data Base)...book ID'd my June 3 Canadians as CBFT2-3, CBVT2-3, and CHAU7-4 (TVA). I recommend this book to any TV-DX'er! This is the first book that seems to be accurate on Canadians and Mexicans. It's also concise and easy to use. However, I still have an unresolved Mexican on June 8. This book is now my DX'ing "bible," outdistancing my former combination of WIFDA TV map book PLUS "Van Jones" North American Radio-TV Station Guide.

Note # 1 - 6/26 @ 1922 - Two XHGC ID's, + offset, something obviously not in new guide. I think I had this a couple of times earlier in June, so I suspect this one to have fairly high power. Anybody know?
 Note # 2 - 6/29 @ 2317 - + offset, could see "XHFE..." briefly stabilize.

With this E skip on June 30, I completed the entire month of June with "known" E skip every day of the month. Has anybody ever noticed this before?
 The June 29 E skip was strange - I had to leave for awhile (a mistake!) and found out Jeff was getting a peppering of FM from NC, SC, GA, FL, AL, TX, CO and MT simultaneously. I suspect that there was a gigantic E skip cloud directly overhead and its eastern, southern and western fringes were bringing those various directions in. The reasons, from my suspicions, were that: (1) Jeff had many catches in the 550-750 mile range, (2) all directions were in at once, and (3) antenna direction apparently didn't make much difference. It'll be interesting to see what people like Seybold and McCormack report - even high band E skip wouldn't surprise me because only a very intense E skip will refract signals virtually straight down to earth.

John Ebeling, 9209 Vincent Avenue South, Bloomington, MN 55431 (Alborn MN DX) CDT

Note - 6/29 @ 1630 to 2300 - Channels 2-6 filled with E skip. Local channel 3 and 6 unwatchable. Time spent on FM

The June 29 opening was one of the best in years. On FM, I was getting Texas, Florida, Louisiana, Mississippi, Georgia, and even a couple of Arkansas stations thrown in. I logged KKQ, Houston, on 92.9 over "local" WSCD in Duluth and also had stations over-riding Grand Rapids stations on 91.7 and 96.9, but was unable to identify them. All in all, a super opening in which I was lucky enough to be in at the start and have time to follow through to the conclusion. I did have to take time about 2000 to make supper, however, so that gave me a respite. Believe me, I made a quick supper! Wife is due back from Europe tomorrow, so I won't have to worry about my own meals anymore.

Eric Bueneman, P.O. Box 1202, Florissant, MO 63031-0202 (DX from Hazelwood) CDT

Intense E skip on June 14, but no Barbados this time! On June 14, WPBT-2 and WTVJ-4 managed to sneak in behind my locals! 1987 should be just as good (if not better) than 1986. 73

That logging of WQPT-14 that I made a few months ago should have been WJPT-14. My mistake.

That's all for now unless something earthshaking comes up other than the earthquake that took place recently. I didn't notice a thing here when that took place. 73, Bill

I logged more E skip in June than any month before. Skip was in nearly every day the first 22 days of the month. I didn't have time to watch all the openings. Channel 4 in Columbus, Mississippi was the shortest E skip in three years at 567 miles. Also 750 mile plus tropo on June 7.

I marked CBVT2-3 down as tentative even though I took several photos of their TP. "Quebec" was at the top - "Radio Canada" at the bottom. Does Quebec mean Quebec City? This would narrow the possibilities to one station. I saw color bars with "Moncton" on channel 5. This has to be CBFT1 in Fredericton, New Brunswick. Also, CFSS, channel 3, ID's as CKOS cable 11. I have photos of all the above. The new TV Data Base was a great help.

(Bill, see Frank Merrill's observations on CBVT-3. He noted the same TP's. fm)

Note # 1 - 6/17 @ 1930-2030 - Channels 2-6 were a total mess with rapidly fading E skip. No ID's. I never saw channel 6 so messy before.

Note # 2 - 6/20 @ 1328 - ID'd as "Channel 4, Cable 6 in Thunder Bay" WHO'S THIS????

Note # 3 - 6/23 @ 2230 - MUF went from channel 2 to channel 6 for about 10 minutes then vanished.

Note # 4 - 6/30 @ 1157 - ID said "XHIT-C" What's the "C" for?

Ninety five percent of listed E skip was seen with the vertically polarized Winegard fed into four television sets. One set is used as a "master" for photographing ID's. All distances are from John Combs list which seems to be accurate to within one mile.

Lots of E skip this report. I broke two personal records here. The latest E skip is now at 0400 when CKND2-2 and KNAZ-2 were seen. The earliest E skip was at 0500 with WPBT-2's test pattern for about seven minutes. WPBT is by far the most common E skip station here with WESH-2 close behind. Some close-in E skip was also seen with KSNC-2 being the closest at 455 miles.

The Canadian situation continues to get more bizarre. The oddball catch this month was a station on channel 2 which ID'd as "Channel 4, Cable 6 in Thunder Bay." In as much as there is already a channel 2 in Thunder Bay, unrelated to channel 4 there, this one has me baffled. Other Canadian mysteries: What two stations on channel 3 run Phillips test patterns all night; one which has "Montreal" at the top and the other which has "Quebec" on top. Are any of these CBFT-2 translators???

Jeff Kadet (continued)

The list of stations carrying TBN in the June VUD solved a BIG mystery. That being the TBN on channel 56 which has been on for about a year, but has never identified as far as I can tell. It turns out it's from Columbia, Missouri at 135 miles. KOIA-15 was noted testing again. Are they due to come back on soon?

Hope everybody is having a good time at the convention. Stations photographed: 605. 73, W3CRH

(Jeff, an observation on your mystery on channel 2 - while it is true that CKPR-2 and CHFD-4 at Thunder Bay do carry separate programming, they are not exactly unrelated. Both are owned and operated by the same company, Thunder Bay Electronics, from the same studios by the same personnel and broadcast from the same tower. Whether the announcement you heard was accidentally or intentionally transmitted over CKPR-2, I think there is a good likelihood that was what you noted. fm)

Greetings from California. I hope everyone is having a great DX season so far. A quick reintroduction: I'm 43 years old, single, and work for the Santa Clara Fire Department (fifteen years). I've been a ham for 5 years and have been TV-DX'ing off and on since about 1959. My best catch is WCBS-2, New York, at 2552 miles.

I had my doubts about this season as May was pretty dry. The only identifiable DX was KEYT-3 in Santa Barbara, hardly a great catch. I took a vacation through the south-west May 28 - June 7, figuring I wouldn't miss much - which I didn't. On June 8th, the E skip hit and they've been in all month, truly a great month. In fact, one of the best June's I can recall for California. I'm anxious to see how the rest of the DX'ers have done for June.

I received my WITFCA TV Station Data Base. Bill, you did a great job! I plan to upgrade my maps from the old TV station guide. I like using them for quick reference.

Good DX to all. I hope to have more DX to report next month.

What a month! This is the most DX I've ever received in June. The 14th was incredible - over 12 straight hours with DX extending from Mexico to Canada. I put up a quad loop cut for channel 3 before it all started and have had some good results with it. I've noticed that my quad loops only tend to work once the DX is in - but there is a noticeable gain. I noticed that KSTP ran an ID slide at the end of their news with KRWF-TV - are they affiliated now? The Television Data Base lists them as KRWF (no -TV) and no network. Speaking of which, I am very pleased with the Television Data Base and think it is an excellent resource. Hope this great DX continues!

A much fatter than normal April with an early E skip season and the usual binges of the Gulf tropo.

XERV-9 in Reynosa was seen running color bars with its ID imbedded in the vertical blanking bar! A nice trick that I sure wish everyone would emulate!

April 28 E skip (on FM at least) just may have been the best day for that mode that I've ever seen in an April. 73, Pat, WA5IYX

John Jefferson, 4016 Crest Ct., Pleasanton, CA 94566

MDT

Equipment: JVC AH-7200U VCR as tuner (with Hitachi CT-922 as monitor) fed by a Channel Master VHF antenna and a Winegard CH-9095 UHF antenna. Both are on a 20' mast, about 35' off the ground, the UHF is 3' higher, with Winegard AG-4990 preamp (and separate lead).

No new TV loggings here all year, but I suppose I'd better submit what I've seen this season. Never did get last year's report off. The VCR tapes still await editing.

John Jefferson (continued)

not that I expect much on them besides CCI and unids. This year I just gave up on the VCR, so what follows is it! As always, I tended to go to the FM when the MUF reached it, so the better openings tend to have gaping holes in the middle. It's too discouraging sticking it out on the TV without a single lowband channel open!
